MILK PRODUCTION AND DAIRY PRODUCTS  
ANNUAL STATISTICAL SUMMARY, 1967

MILK COWS AND MILK PRODUCTION, 1967

The Nation's milk cows produced 119.3 billion pounds of milk in 1967. This is slightly less than the revised estimate of 119.9 billion pounds produced in 1966. The number of milk cows on farms in 1967 averaged a record low 13,524 thousand, 4 percent below 14,093 thousand in 1966 and 16 percent below the 1961-65 average. The record high output per cow of 8,821 pounds in 1967 was 4 percent above the previous record of 8,507 pounds in 1966. Revised estimates for 1966 and 1967 result from the annual review of more complete production and utilization data.

Milk production in 1967 was 6 percent below the record 1964 output of 127.0 billion pounds and the smallest since 1952. Regionally, production decreased 2 percent in the North Atlantic and 1 percent in the East North Central, but gained slightly in the West North Central and 1 percent in the rest of the Nation. Production in 1967 increased in 20 States, Florida was up 7 percent, the largest percentage gain, followed by Texas with a 5-percent gain. The sharpest declines, at 8 percent, were reported in Rhode Island and New Jersey. Declines were 7 percent in Indiana and in Michigan. U. S. milk production was above a year earlier during the first 2 months in 1967 but slightly below a year earlier for the rest of the year.

Annual output per cow set a new record high of 8,821 pounds in 1967, up 4 percent from the 1966 record of 8,507 pounds. Rate per cow increased in all Regions--ranging from 1 percent in the North Atlantic to 7 percent in the South Central. California's 1967 rate per cow was 11,170 pounds, continuing to lead the Nation. Arizona was second at 10,570 pounds and Hawaii, third at 10,200 pounds. New Jersey, Connecticut, and Washington each had rates of more than 10,000 pounds.

The Nation's milk cow herd averaged 13,524,000 head in 1967--the smallest since the series began in 1924. Milk cow numbers have declined steadily since 1953. Milk cows on farms in 1967 were down 4 percent from 1966 and 16 percent below average. Decreases were recorded in all regions --ranging from one percent in the West to five percent each, in the West North Central and South Central.

The January 1, 1968 inventory of cows and heifers 2 years old and older kept for milk is estimated at 14,662 thousand, down 4 percent from a year earlier, and the least in 80 years. The 4-percent decline in 1967 compared with 5 percent a year earlier and 6 percent in 1965. Replacement heifers 1-2 years old kept for milk on January 1, 1968 are estimated at 3,566 thousand, 2 percent less than a year earlier. Replacement heifer calves under 1 year old totaled 4,003 thousand on January 1, also down 2 percent. Total heifers and calves kept for dairy replacement stock on January 1, were 52 percent of the number of cows and heifers 2 years old and older kept for milk, compared with 51 percent a year earlier. Cows and heifers eliminated from dairy herds during 1967 were 27 percent of the number 2 years old and older on hand at the beginning of the year, the rate of elimination has declined each year since 1965.

---

## MANUFACTURED DAIRY PRODUCTS, 1967

United States production in 1967 set record highs for American cheese, Italian cheese, Brick and Munster cheese (combined), creamed cottage cheese, ice milk, and Mellorine. Ice cream and cottage cheese curd each almost equalled the record set in 1965. Production of swiss and blue mold cheeses were second only to records of 1966. Limburger cheese production was at a record low in 1967.

Total cheese production in 1967 was a new high at 1,897 million pounds, 2 percent above the previous record set in 1966. American cheese totaled 1,271 million pounds, 4 percent above a year earlier, accounting for two-thirds of total cheese output. Wisconsin had 45 percent of the total, leading all States in production of American cheese, followed by Missouri with 7 percent. Italian cheese production in 1967 was 273 million pounds, up 2 percent from a year earlier, for the 16th consecutive annual record high. Swiss cheese output totaled 130 million pounds -- 5 percent below 1966. Combined production of Brick and Munster cheese was 55 million pounds, 4 percent above a year earlier. Blue mold cheese production, estimated at 19 million pounds, was 4 percent less than 1966. Other cheese, not classified, totaled 33 million pounds, 13 percent below 1966. Creamed cottage cheese production, at 842 million pounds, was 1 percent above a year earlier and fractionally above the previous record high set in 1965. Production of limburger cheese, at 2.7 million pounds, was 14 percent below 1966 and 15 percent below the 1961-65 average. Cream cheese production in 1967 was 106 million pounds--down 4 percent from both a year earlier and the 5-year average. Neufchatel cheese output, at 6.4 million pounds, was 14 percent above 1966, but 2 percent below average.

Creamery butter made in 1967 totaled 1,233 million pounds. This is up 11 percent from a year earlier, but except for 1966, the lowest production since 1952. Minnesota continued to lead in butter production, with 26 percent of the United States total. Wisconsin was second with 20 percent, and Iowa, third with 11 percent.

Total ice cream production in 1967 was 757 million gallons, 1 percent above a year earlier. Ice milk output set a new high of 256 million gallons, gaining 6 percent -- the 23rd consecutive annual increase. Production of milk sherbet totaled 47 million gallons--down 2 percent from 1966, but 10 percent above average. Mellorine production totaled 54 million gallons, 4 percent above 1966.

Evaporated whole milk production in 1967 was 1,499 million pounds, 12 percent less than a year earlier and the lowest since 1931. Production of canned sweetened condensed whole milk, at 64 million pounds, was half of the 1966 total and lowest since 1959. Total nonfat dry milk for human food was 1,694 million pounds--an increase of 6 percent from 1966, but 19 percent below average. Dry whole milk output, at 83 million pounds, was down 12 percent from a year earlier and 5 percent below average. Dry buttermilk production in 1967 was 70 million pounds, 9 percent below the previous year, and 21 percent below average.

### FLUID MILK AND CREAM: Sales, Receipts, and Prices, 1967

Average daily sales of whole milk (preliminary) during 1967 in 9 State and 67 Federal areas were 3 percent below 1966. Sales of skim milk and low-fat products in 75 of these areas were 13 percent higher than in 1966. In 74 areas, total sales of mixtures of milk and cream (half and half) were down 7 percent from 1966 and sales of cream items, down 5 percent.

Producer receipts of milk in 74 marketing areas (8 State and 66 Federal) during 1967 averaged nearly 139 million pounds per day. This was less than one percent above 1966. The average number of producers during 1967 in these areas was about 130,000--down 5 percent from 1966. Receipts per producer in these marketing areas in 1967 averaged 1,063 pounds per day--up 6 percent from 1966.

Dealers' prices paid for milk used in fluid products in 1967 averaged \$6.18 per hundredweight--up 36 cents from 1966. In 1967 averages were higher, month by month, compared with the previous year's monthly averages.

Store prices to consumers in 1967 for whole milk of the most common grade and kind of container in 25 major cities averaged 50.7 cents per half gallon. This was 1.3 cents per half gallon higher than in 1966.

Half gallons delivered to homes in the 25 city markets averaged 57.0 cents--up 2.5 cents from 1966. Increases from 1966 of one cent per half gallon or more were reported in 20 of the 25 cities. Only one city reported a decrease.

### Cold Storage Stocks of Dairy Products

Warehouse stocks of fluid cream averaged 11.1 million pounds per month in 1967, slightly less than in 1966. During the first half of 1967, end-of-month stocks were larger than each of the corresponding months in 1966 but lower for the last half of the year. Plastic cream stocks were below 1966 levels for each month except January. Holdings averaged 1.6 million pounds per month, compared with 2.2 million in 1966.

Creamery butter holdings reached their maximum on August 31, 1967 when 233 million pounds were stored. Monthly holdings were larger than those of 1966 throughout 1967, averaging 153.4 million pounds compared with the 1966 monthly average of 52.9 million pounds.

End-of-month stocks of American cheese for each month of 1967 exceeded those of a year earlier. Holdings averaged 357 million pounds, compared with 303 million in 1966. Holdings were highest at 404 million pounds on August 31.

Swiss cheese stored in 1967 averaged 12.4 million pounds per month compared with 11.8 million in 1966. Holdings during the first half of the year were generally higher than in 1966 but dropped below year-earlier levels during the last half of 1967.

1/ Revisions for 1966, by States and by months, for butter and byproducts and American cheese, were published by the Chicago Dairy office in the August 1967 issue "Milk Prices Paid by Creameries and Cheese Plants" released September 29, 1967. Data for 1967 are preliminary.

2/ Includes all types of natural cheese except American.

3/ Revisions for 1966 by States and by months, for evaporated milk, were published in the August 1967 issue of the "Evaporated, Condensed, and Dry Milk Report" released September 29, 1967. Data for 1967 are preliminary.

4/ Represents average prices received and average fat tests of all manufacturing grade milk sold by farmers, including premiums, before hauling costs are deducted. Current prices and fat tests for this series, with parity price equivalents, are published each month in the "Agricultural Prices" report. The 1966 figures are revised and 1967 preliminary.

Table 12.-Evaporated whole milk: Manufacturers' average selling price per case of 48 14½-oz. cans in cartons, annual averages by geographic divisions, 1965-67; by months: U. S. 1965-67, divisions 1967 1/

1/ Data for Federal order markets compiled by Dairy Division, C&MS, USDA from reports by market administrators. Data for State-regulated markets compiled by milk control agencies. Data are revised for the year earlier, preliminary for the latest year. Data adjusted to a comparable basis where marketing areas have been changed significantly. 2/ Federal order market unless footnote indicates otherwise. Markets combined in each group are listed on page 25. 3/ Sales for marketing area as defined prior to 1967 amendment. 4/ Data from State milk control agency. 5/ Delaware Valley less sales in New Jersey as reported by N.J. Office of Milk Industry. 6/ Excludes sales in Mississippi portion of Memphis marketing area. 7/ Data from Federal and State sources. 8/ Average fat test for markets where milkfat totals are available. 9/ Totals do not include Federal market area in New York.

Table 17--Average daily receipts of milk from producers, number of producers, and average daily receipts per producer for plants under Federal or State regulation 1966-67 1/

1/ Data for Federal order markets compiled by Dairy Division, C&MS, USDA from reports by market administrators. Data for State-regulated markets compiled by milk control agency. Data are revised for the year earlier, preliminary for the latest year shown.

- 2/ Federal order market unless footnote indicates otherwise. Markets combined in each group are listed on page 25.
- 3/ Federal totals less State data on receipts from New Jersey or Mississippi producers where applicable.
- 4/ Data from State sources.
- 5/ Receipts for marketing area as defined prior to 1967 amendment.
- 6/ Data from Federal and State sources.

MARKETS COMBINED IN SALES AND RECEIPTS TABLES

The following markets have been combined in Tables 16 and 17 of this report; Ohio-Cincinnati, Columbus, Miami Valley, Northeastern, Northwestern and Youngstown-Warren; Indiana-Fort Wayne and Indianapolis; Northwestern Indiana (Sales); Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison and Northeastern; Milwaukee (Sales); Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Florida-Southeastern Florida, and Tampa Bay; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), North-east (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.
